Announcement

HQO Announces Health Technology Fund Program Award Results

Dr. Les Levin, Vice President of Health Quality Ontario's (HQO's) Evidence Development and Standards branch, is pleased to announce the results of the 2014/2017 Health Technology Fund Program Request for Proposal Competition. The awards program followed a rigorous, competitive process based on best practices. Congratulations to the successful candidates:

- [Ottawa Hospital Research Institute \(OHRI\)](#)
- [St. Joseph's Healthcare Hamilton: Programs for Assessment of Technology in Health \(PATH\) Research Institute](#)
- [University Health Network: HumanEra](#)
- [University Health Network: Toronto Health Economics and Technology Assessment \(THETA\) Collaborative](#)

HQO's Health Technology Fund supports Ontario-based research institutes focused on multi-centred clinical trials and economic evaluation, as well as institutes engaged in evaluating the safety and usability of health technologies.

This research complements the systematic reviews conducted by HQO and helps to inform recommendations by the organization's Board of Directors to promote patient care that is based on the best scientific evidence.
