

# Common Quality Agenda: Measuring Up 2016 (by Quality Element)

## Safe

*C. difficile* infections acquired in hospital

Use of daily physical restraints in long-term care

Falls in long-term care homes

Use of physical restraints in acute mental health care

Lost time injury rates for health workforce

Use of antipsychotic medications in long-term care homes

## Effective

Smoking

Physical inactivity

Obesity

Inadequate fruit and vegetable intake

Self-reported health status

Infant mortality

Life expectancy

Potential years of life lost

Having a primary care provider

Overdue for colorectal cancer screening

Diabetes eye exam

Hospital readmission for a mental illness or addiction

Follow-up after hospitalization for mental illness or addiction

Suicides

Hospital readmission of medical or surgical patients

Hospitalization for conditions that could be managed outside hospital

Prescription medication insurance

Pain experiences by residents in long-term care

Unplanned visits to the emergency department (palliative)

Follow-up after hospitalization for chronic obstructive pulmonary disease or heart failure

## Patient-centred

Accessing after-hours primary care

Patients involvement in decisions about their own care

Patient experience with home care

Distress among unpaid caregivers of home care patients

Hospital patient experience

Depression in long-term care homes

Home care services (palliative)

Home visits by a doctor (palliative)

Location of death

## Efficient

Placement in long-term care homes from home care

Caesarean section deliveries

Patients in hospital who could be receiving care elsewhere

Ontario's nurse workforce

Ontario's doctor workforce

Total health spending per person

Health spending on drugs per person

## Timely

Same-day or next-day access to a primary care provider

Waiting for home care services

Emergency department length of stay

Hip and knee replacement completed within target wait time

Cardiac procedure wait times

Cancer surgery wait times

Waiting to be cared for in a long-term care home

**Equitable:** measures considered through an equity lens

# Common Quality Agenda: Measuring Up 2016 (by Sector/Focus Area)

## Health of Ontarians

Smoking

Physical inactivity

Obesity

Inadequate fruit and vegetable intake

Self-reported health status

Infant mortality

Life expectancy

Potential years of life lost

## Primary Care

Having a primary care provider

Same-day or next-day access to a primary care provider

After-hours access to care

Patients involvement in decisions about their own care

Overdue for colorectal cancer screening

Diabetes eye exam

## Mental Illness & Addictions

Follow-up after hospitalization for mental illness or addiction

Hospital readmission for mental illness or addiction

Suicides

Physical restraint of patients with mental illness or addiction

Depression in long-term care homes

## Home Care

Waiting for home care services

Patient experience with home care

Distress among unpaid caregivers of home care patients

Moving into long-term care homes

## Hospital Care

Patient experience

Emergency department length of stay

Hip and knee replacement completed within target wait times

Cardiac procedure wait times

Cancer surgery wait times

*C. difficile* infections acquired in hospital

Caesarean section deliveries

## Long-Term Care

Waiting to be cared for in a long-term care home

Use of antipsychotic medications

Pain experiences by residents

Use of physical restraints

Falls among residents

## Palliative Care

Home care services

Home visits by a doctor

Unplanned visits to the emergency department

Location of death

## System Integration

Follow-up after hospitalization for chronic obstructive pulmonary disease or heart failure

Hospital readmission of medical or surgical patients

Hospitalization for conditions that could be managed outside hospital

Patients in hospital who could be receiving care elsewhere

## Health Workforce

Ontario's nurse workforce

Ontario's doctor workforce

Lost time injury rates

## Health Spending

Total health spending per person

Health spending on drugs per person

Prescription medication insurance
