Table 8: Patient-reported outcome measure (PROM) ........................................................................ 18
Technical Appendix Overview

This technical appendix accompanies Health Quality Ontario’s Quality Standard *Schizophrenia: Care for Adults in Hospitals*. The appendix provides additional information on the outcome indicators that were identified as important and that would provide comprehensive measurements of the overall quality of care associated with this quality standard. It also includes information on the definitions and technical details of the indicators, including data sources for indicators that can be consistently measured at the provincial level.

Indicators are categorized as follows:

- Currently measured in Ontario or similar health systems (i.e., the indicator is well defined and validated)
- Measurable with available provincial data (i.e., data are available to measure the indicator, but the indicator requires definition and validation)
- Developmental (i.e., the indicator is not well defined, and data sources do not currently exist to measure it consistently across providers and at the system level)
# Outcome Indicators

## Table 1: Number of deaths by inpatient suicide among people with a primary diagnosis of schizophrenia

<table>

<td>Dimensions of quality</td>
<td>Effectiveness, safety</td>
<td></td>
</tr>
</tbody>
</table>

### Calculation

- **DAD**
  - Group 15: Mental Health Indicators Field 06 Suicide = 1 (successful suicide).
  - ICD-10-CA code X60-X84 Intentional Self-Harm as diagnosis type 9 (External Cause of Injury code) AND U98.20 Place of Occurrence, Hospital, as diagnosis type 9 (External Cause of Injury code).

- **OMHRS**
  - Discharge Reason (Data Element X90) = 2 (died as a result of suicide).

**Note:** OMHRS methodology requires further development and validation.

### Inclusions
- Among acute care discharge from episode of care in which schizophrenia was coded as most responsible diagnosis.
- Age ≥ 18 years.
- Diagnosis codes:
  - ICD-10-CA: F20 (Schizophrenia) and F25 (Schizoaffective Disorder).
  - DSM-IV: 295 (Schizophrenia and Schizoaffective Disorder).
- Diagnosis type:
  - DAD: Most Responsible Diagnosis (diagnosis type = M) or a Type 1 diagnosis.
  - OMHRS: DSM-IV in Q2A/Q2D.

### Data sources
- DAD, OMHRS.

### Risk adjustment, age/sex standardization
- Reported as crude numbers.

### Geography and timing
- Timing and frequency of data release: Yearly.
- Levels of comparability: Province, LHIN region, and hospital.
<table>

**DEFINITION AND SOURCE INFORMATION**

**Calculation**

**Denominator**

Acute care discharges in which schizophrenia is coded as most responsible diagnosis. The index cases are identified from both the DAD and OMHRS databases.

**Inclusions**

- Age ≥ 18 years
- Diagnosis codes
  - ICD-10-CA: F20 (Schizophrenia) and F25 (Schizoaffective Disorder)
  - DSM-IV: 295 (Schizophrenia and Schizoaffective Disorder)
- Diagnosis type
  - DAD: Most Responsible Diagnosis (diagnosis type = M)
  - OMHRS: DSM-IV in Q2A/Q2D

**Exclusions**

- Records without a valid health insurance number
- Records without an Ontario residence
- Gender not recorded as male or female
- Invalid date of birth, admission date/time, discharge date/time
- Discharges where patients signed themselves out or patients died from a cause other than suicide

**Numerator**

The number in the denominator who die within 30 days of discharge with the leading cause of death identified as suicide

- ICD-10 codes: X60-X84, Y87.0

**Method**

Numerator ÷ Denominator × 100

**Data sources**

DAD, OMHRS, Vital Statistics (Statistic Canada)

**Risk adjustment, age/sex standardization**

Reported as crude numbers

**GEOGRAPHY AND TIMING**

**Timing and frequency of data release**

Yearly

**Levels of comparability**

Province, LHIN region, and hospital

### Indicator status
- Currently measured

### Dimension of quality
- Effectiveness

### Calculation

#### Denominator
Acute care discharges from episode of care in which schizophrenia was coded as most responsible diagnosis. The index cases are identified from both the DAD and OMHRS databases.

**Inclusions**
- Age \( \geq \) 18 years
- Diagnosis codes
  - ICD-10-CA: F20 (Schizophrenia) and F25 (Schizoaffective Disorder)
  - DSM-IV: 295 (Schizophrenia and Schizoaffective Disorder)
- Diagnosis type
  - DAD: Most Responsible Diagnosis (diagnosis type = M)
  - OMHRS: DSM-IV in Q2A/Q2D
- Discharge disposition
  - DAD: 04 (discharged to home or home setting with support services) or 05 (discharged to home with no support service from an external agency required)
  - OMHRS: X90 = 1 (a planned and regular discharge)

**Exclusions**
- Records without a valid health insurance number
- Records without an Ontario residence
- Gender not recorded as male or female
- Invalid date of birth, admission date/time, discharge date/time

*Note:* Admission to another institution within 24 hours of discharge from an institution should be considered part of the same episode of care.

#### Numerator

**a. Any reason**
Subsequent readmission to an acute care hospital within 7 and 30 days of index hospitalization discharge for any reason

Exclusion: Elective readmission in DAD (admit category = L)

**b. Mental health and addictions–related condition**
Subsequent readmission to an acute care hospital within 7 and 30 days of index hospitalization discharge for a most responsible diagnosis (i.e., diagnosis type = M in DAD or DSM-IV in Q2A/Q2D, or provisional diagnosis Q1D/Q1E/Q1F/Q1G/Q1O/Q1P = 1 in OMHRS) of a mental health and addictions–related condition, including:
- **Substance-related disorders**—ICD-10-CA: F55, F10 to F19; DSM-IV: 291.x (0, 1, 2, 3, 5, 81, 89, 9), 292.0, 292.11, 292.12, 292.81, 292.82, 292.83, 292.84, 292.89, 292.9, 303.xx (00, 90), 304.xx (00, 10, 20, 30, 40, 50, 60, 80, 90), 305.xx (00, 10 to 90 excluding 80); provisional diagnosis: (d) substance-related disorders; or
- **Schizophrenia, delusional, and nonorganic psychotic disorders**—ICD-10-CA: F20 (excluding F20.4), F22, F23, F24, F25, F28, F29, F53.1; DSM-IV: 295.xx (10, 20, 30, 40, 60, 70, 90), 297.1, 297.3, 298.8, 298.9; provisional diagnosis: (e) schizophrenia and other psychotic disorders; or
- **Mood/affective disorders**—ICD-10-CA: F30, F31, F32, F33, F34, F38, F39, F53.0; DSM-IV: 296.0x, 296.2x, 296.3x, 296.4x, 296.5x, 296.6x, 296.7, 296.80, 296.89, 296.90, 300.4, 301.13; provisional diagnosis: (f) mood disorders; or
- **Anxiety disorders**—ICD-10-CA: F40, F41, F42, F43, F48.8, F48.9; DSM-IV: 300.xx (00, 01, 02, 21, 22, 23, 29), 300.3, 308.3, 309.x (0, 3, 4, 9), 309.24, 309.28, 309.81; provisional diagnosis: (g) anxiety disorders or (o) adjustment disorders; or
- **Selected disorders of adult personality and behaviour**—ICD-10-CA: F60, F61, F62, F69, F21; DSM-IV: 301.0, 301.20, 301.22, 301.4, 301.50, 301.6, 301.7, 301.81, 301.82, 301.83, 301.9; provisional diagnosis: (p) personality disorders

Exclusion: Elective readmission in DAD (admit category = L)

c. **Schizophrenia**
   Subsequent readmission to an acute care hospital within 7 and 30 days of index hospitalization discharge for a most responsible diagnosis (i.e., diagnosis type = M in DAD or DSM-IV in Q2A/Q2D) of schizophrenia:
   - ICD-10-CA: F20 (Schizophrenia) and F25 (Schizoaffective Disorder)
   - DSM-IV: 295 (Schizophrenia and Schizoaffective Disorder)

Exclusion: Elective readmission in DAD (admit category = L)

</tbody>
</table>

**GENERAL DESCRIPTION**

**Indicator status**

**Effectiveness**

**Denominator**

Acute care discharges from episode of care in which schizophrenia was coded as most responsible diagnosis. The index cases are identified from both the DAD and OMHRS databases.

**Inclusions**

- Age ≥ 18 years
- Diagnosis codes
  - ICD-10-CA: F20 (Schizophrenia) and F25 (Schizoaffective Disorder)
  - DSM-IV: 295 (Schizophrenia and Schizoaffective Disorder)
- Diagnosis type
  - DAD: Most Responsible Diagnosis (diagnosis type = M)
  - OMHRS: DSM-IV in Q2A/Q2D

**Exclusions**

- Records without a valid health insurance number
- Records without an Ontario residence
- Gender not recorded as male or female
- Invalid date of birth, admission date/time, discharge date/time
- Discharges where patients signed themselves out or patients died

**Numerator**

a. Any reason

Subsequent unscheduled ED visit within 7 and 30 days of index hospitalization discharge for any reason

Exclusion: ED visits that result in admission (i.e., visit disposition = 06 or 07) are excluded from the calculation of this indicator as this subset is captured in the readmission indicator.

b. Mental health and addictions–related condition

Subsequent unscheduled ED visit within 7 and 30 days of index hospitalization discharge for main problem of a mental health and addictions–related condition:

- Substance-related disorders—ICD-10-CA: F55, F10 to F19, or
- Mood/affective disorders—ICD-10-CA: F30, F31, F32, F33, F34, F38, F39, F53.0, or
- Anxiety disorders—ICD-10-CA: F40, F41, F42, F43, F48.8, F48.9, or
- **Selected disorders of adult personality and behaviour**—ICD-10-CA: F60, F61, F62, F69, F21

  Exclusion: ED visits that result in admission (i.e., visit disposition = 06 or 07) are excluded from the calculation of this indicator as this subset is captured in the readmission indicator.

c. **Schizophrenia**

  Subsequent unscheduled ED visit within 7 and 30 days of index hospitalization discharge for a main problem of schizophrenia:
  - ICD-10-CA: F20 (Schizophrenia) and F25 (Schizoaffective Disorder)

  Exclusion: ED visits that result in admission (i.e., visit disposition = 06 or 07) are excluded from the calculation of this indicator as this subset is captured in the readmission indicator.

d. **Self-harm**

  Subsequent unscheduled ED visit within 7 and 30 days of index hospitalization discharge for a main problem or other problem of self-harm:
  - ICD-10-CA: X60 to X84 (Intentional Self-Harm)

  Exclusion: ED visits that result in admission (i.e., visit disposition = 06 or 07) are excluded from the calculation of this indicator as this subset is captured in the readmission indicator.

### Method

\[
\text{Numerator} \div \text{Denominator} \times 100
\]

<table>
<thead>
<tr>
<th>Data sources</th>
<th>DAD, NACRS, OMHRS</th>
</tr>
</thead>
<tbody>
<tr>
<td>Risk adjustment, age/sex standardization</td>
<td>Reported as crude rates. Risk adjustment needs further investigation.</td>
</tr>
<tr>
<td>Timing and frequency of data release</td>
<td>Yearly</td>
</tr>
<tr>
<td>Levels of comparability</td>
<td>Province, LHIN region, and hospital</td>
</tr>
</tbody>
</table>

### Limitations

Capturing intention of self-harm with available data sources is difficult. Unintentional or undetermined injuries are excluded from this indicator, despite the fact that, in some cases, the injuries may have been intentional.

### Comments

Alignment
