Entering Targets in QI RAP

LHINs enter Health Link specific targets.

One fiscal target number is used for both Coordinated Care Plans and Primary Care Providers. This enables alignment with targets set by Health Links and LHINs and allows better consistency in target setting between measures.

Health Link team will be able to see both count data and the rate of progress toward the fiscal target.

How to enter targets

1. Click on the 'ENTER TARGET' link on the left hand menu:

2. Select your LHIN and the Health Link from the drop-down menus:

Office365 🕡 OpenVoice 汐 TeamHQO	G 📓 T-card statement :	site 🖇 QI RAP Login page			
				Welcome Carol Moore	Close Window
Pontaria				Health	
Health Quality Ontario				Incentin

4. The next screen will be a pop-up window as below. The target population is pre-populated from the Ministry of Health and Long-Term Care figures.

Click on the plus sign at the bottom left hand of the screen to add a new row.

Pontaria	Target Population					TIST STOLES	shit ind

» CUSTOM TEAM ME								

8. Add additional rows for additional years, if desired, saving each row as you go. Once completed, click on the save button in the bottom right hand corner of the screen.

The bottom orange save button is used for saving changes to target population and projected term numbers. It does not save fiscal targets.
