TOTAL PATIENTS: 3

***** END OF PAP SMEAR TARGET POPULATION/SERVICE RPT *****

- CLAIMS RECEIVED AFTER REPORT DATE WILL NOT APPEAR ON THIS REPORT.
- THE TARGET GROUP CONSISTS OF ENROLLED FEMALE PATIENTS WHO ARE 21 TO 69 YEARS OF AGE INCLUSIVE ON MARCH 31ST OF THE PAYMENT YEAR.
- THIS REPORT CONTAINS OHIP APPROVED CLAIMS BASED ON CONSENT PERMISSIONS PROVIDED BY PATIENTS ON THEIR PATIENT ENROLMENT & CONSENT TO RELEASE PERSONAL HEALTH INFORMATION FORM AND MAY NOT INCLUDE ALL PREVENTIVE CARE SERVICES.

Please note that the *TPSR – Previous Report* (sample shown above for the 2016/2017 fiscal year) and the *TPSR – Projected Report* (not shown) are very similar. Differences between these two reports result from the reporting period only. For example, the *TPSR – Projected Report* for the 2017/2018 fiscal year that would accompany the *TPSR – Previous Report* for the 2016/2017 fiscal year (shown above) would reflect a Report Period of Oct 1, 2014 to March 31, 2018, the age of the patients would be as of March 31, 2018, and the patient Lumiere would not appear on the report as she would be 70 years of age on March 31, 2018 (therefore no longer part of the target population for the Pap Smear category).
