

# Looking Back and Looking Forward

A sneak peek for the 2018/19 primary care quality improvement plans (QIPs)

DANYAL MARTIN & MARGARET MILLWARD | DATE: SEPTEMBER 26, 2017

**Health Quality  
Ontario**

*Let's make our health system healthier*

# Learning Objectives

- Share learnings from the 2017/18 QIPs
- Prepare organizations for 2018/19 QIP submission by offering advance notice of changes
- Provide an overview of Health Quality Ontario's resources to support organizations in meeting their goals and supporting change across the system

# Quality Matters

## Embrace Health Quality

● A health system with a culture of quality is . . .

Safe

Effective

Patient-centred

Efficient

Timely

Equitable

● ...stays true to these principles

Commits to ongoing quality improvement

Achieves healthy populations

Ensures accessibility for all

Partners with patients

Balances priorities

Uses resources wisely

● . . . and can only happen when we

Engage patients and the public

Redesign the system to support quality care

Help professionals and caregivers thrive

Ensure technology works for all

Support innovation and spread knowledge

Monitor performance with quality in mind

Build a quality-driven culture

**A just, patient-centred health system committed to relentless improvement. Let's make it happen.**

Read our vision for achieving a quality health system  
*Quality Matters: Realizing Excellent Care For All*

[www.hqontario.ca](http://www.hqontario.ca)

*...Looking Back*

**Provincial Results**

# Provincial Observations: Looking Forward

Home care

Progress in five-day wait time: personal support for complex patients (79%)  
Worsening in hospital readmissions (77%)

Hospital

Progress in medication reconciliation on admission (60%)  
Worsening in alternate level of care rate (54%)

Long-term care

Progress in appropriate prescribing of antipsychotics (76%)  
Worsening in falls (54%)

Primary care

Progress in glycated hemoglobin (HbA1C) testing (71%)  
Worsening patient experience: 'enough time' (41%)

# Provincial Observations: Looking Forward

94%

of organizations selected at least one priority indicator

84%

of organizations are working on at least one of the effective transition indicators

78%

of organizations are working on at least one patient experience indicator

1-5%

is the most common target range set for improvement

# Patient Engagement: Spectrum of Approaches

## Ontario's Patient Engagement Framework

### THE STRATEGIC GOAL

A strong culture of patient, caregiver and public engagement to support high quality health care

### THE GUIDING PRINCIPLES

Partnership

Learning

Empowerment

Transparency

Responsiveness

Respect

### ACROSS THESE DOMAINS

Personal care and health decisions

Program and service design

Policy, strategy and governance

### ACROSS A SPECTRUM OF ENGAGEMENT APPROACHES

#### Share

Provide easy-to-understand health information

#### Consult

Get feedback on a health issue (e.g., policy or decision)

#### Deliberate

Discuss an issue and explore solutions

#### Collaborate

Partner to address an issue and apply solutions

### ENABLED BY:

A culture of continuous quality improvement

Access to easy-to-understand health information

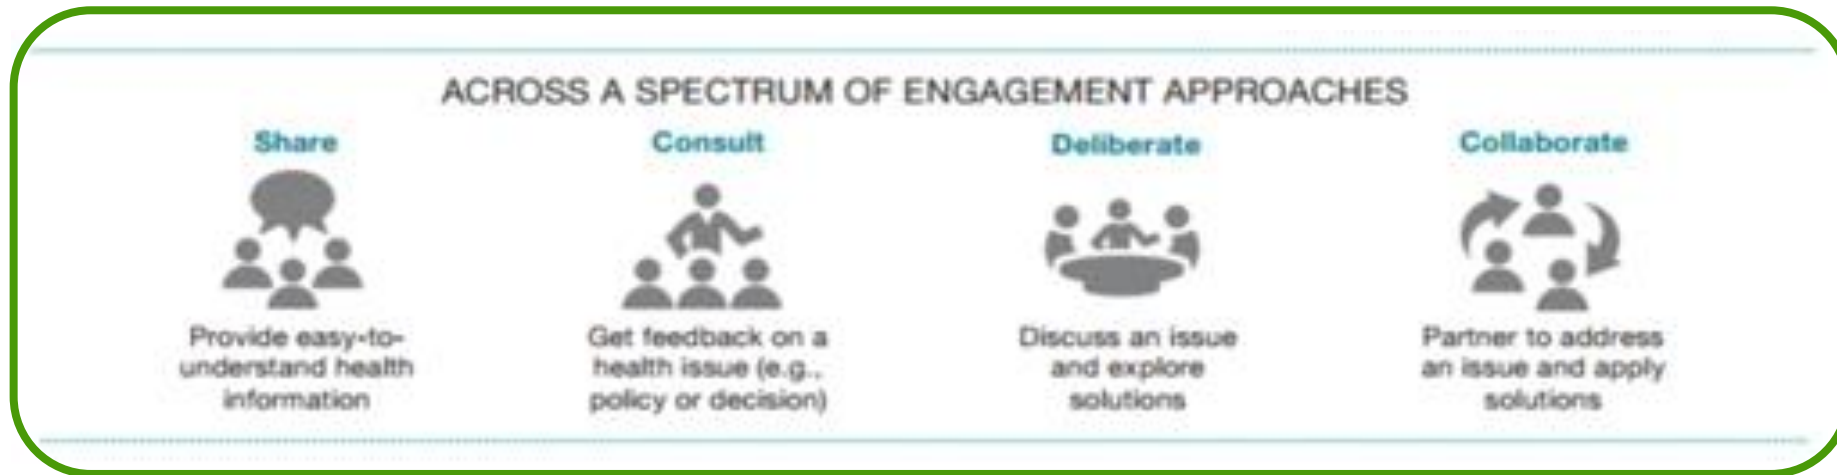

Commitment to health equity and cultural competence

Rigorous research and evaluation

The analysis of patient engagement approaches is structured by Health Quality Ontario's [Patient Engagement Framework](#), which recommends that organizations use a spectrum of engagement approaches.

For brevity, the next few slides use the word “patient”; this includes patients, residents, clients, caregivers and family

# Patient Engagement: Spectrum of Approaches

Engagement is a continuum and organizations are encouraged to use a variety of methods to engage patients and their families. The approaches described to the right are more participatory. There will be overlap (e.g., councils may be deliberating or consulting).

# Focus on QIP Development

---

Comparing percentage of organizations reporting engaging patients and families in development of QIPs or quality initiatives over time

---

Percentage of total organizations

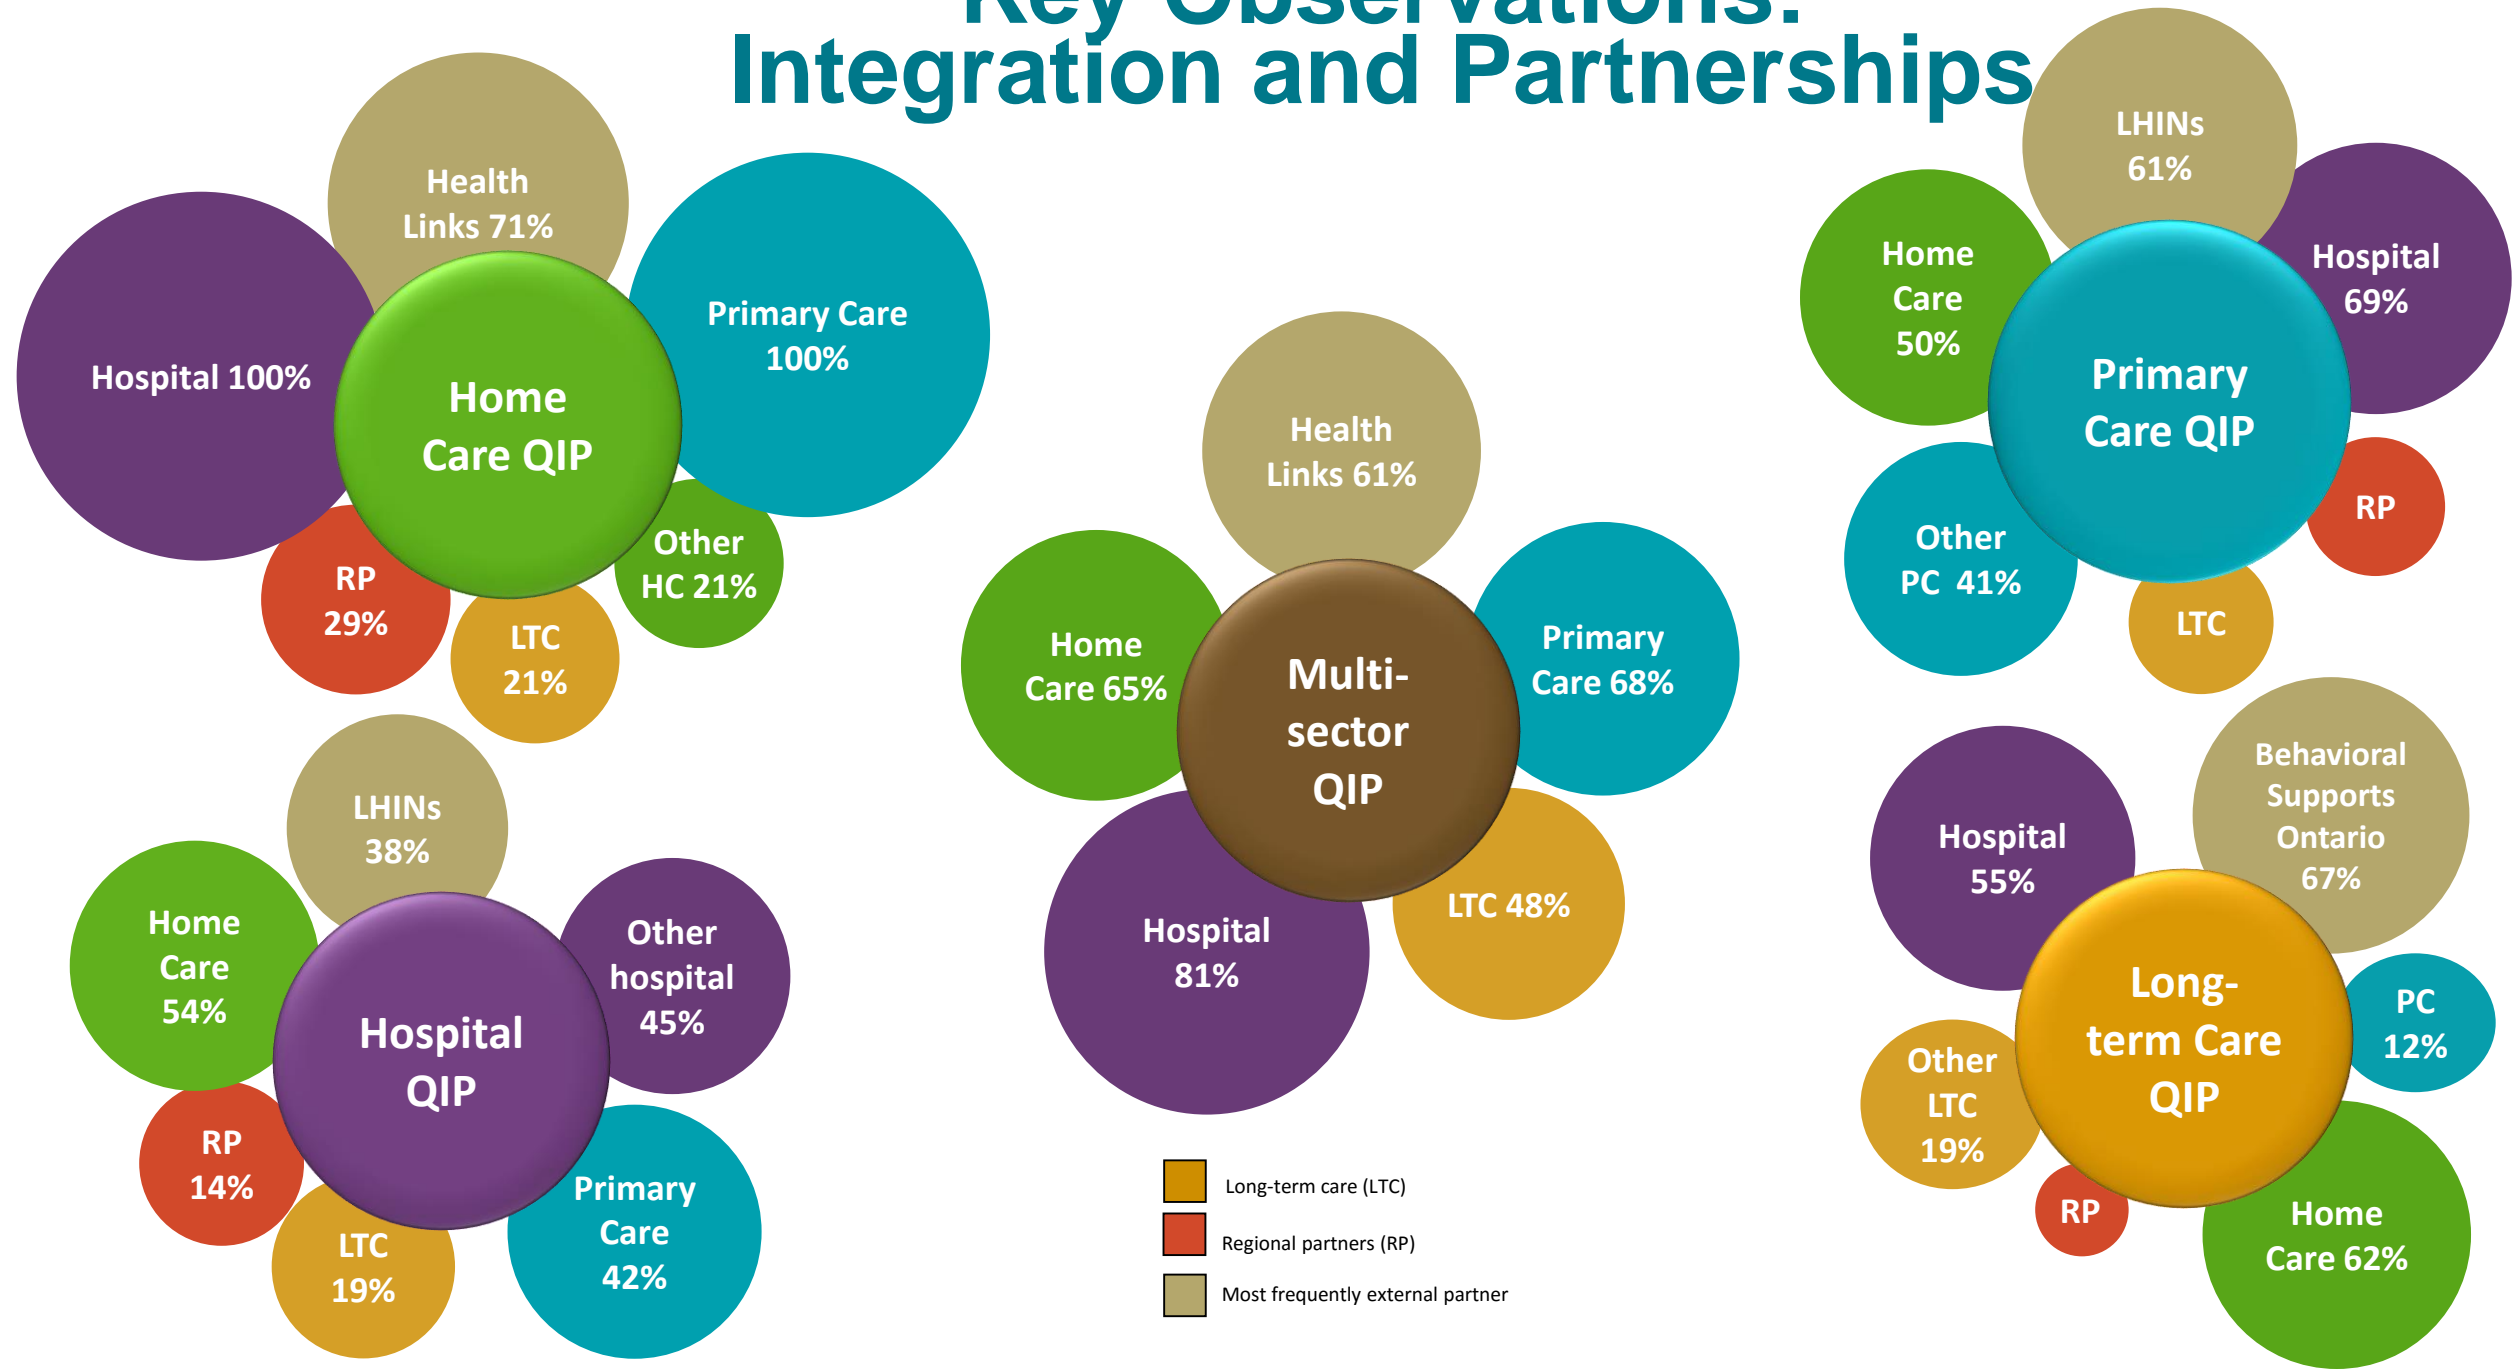

# Key Observations: Patient Engagement

## Overall view of spectrum of patient engagement approach in the 2017/18 QIP Narratives

# Key Observations: Integration and Partnerships

# Key Observations: Equity Strategies

Percentage of organizations citing various equity strategies in their 2017/18 QIP Narratives

Percent

# Of the 1031 QIPs submitted, how many addressed workplace violence prevention?

In the Staff Safety & Workplace Violence Prevention section of the QIP Narrative...

In the Workplan section of the QIP...

A total of **15** organizations submitted **17** indicators related to workplace violence

- 13 hospitals included a total of 15 indicators
- 2 long-term care homes included a total of two indicators

*...Looking Back*

## Primary Care Results

# Key Observations

- Increasingly speaking of working together in small collaboratives, such as the LHIN level, or ARTIC with Choosing Wisely, or Health Links groups.
- Primary care learnings from strategic measurement and reporting enhancing transparency and promoting quality
  - Developing targets
  - Indicator selection
- Uptake of additional indicators including Health Links and medication reconciliation

# Working Together:

## Haileybury FHT: “Towards Reducing ED Visits for CTAS 4 & 5 - Role of Primary Care”

- **Who was the subpopulation?** Haileybury, Great Northern & Temagami FHTs, the CHC, our QIDSS and the Temiskaming Hospital focused on primary care patients who were attending the ER for non-urgent issues
- **What did the Haileybury FHT do?** Identified Urinary Tract Infections (UTIs) were one of the top diagnosis for CTAS 4 & 5 visits.
- **How did the process change to support this work?** Provided targeted patient education to ensure patients knew they do not require to book an appointment with their provider for urine testing/treatment
- **What was the outcome?** CTAS 4 & 5 were 10% lower. UTIs are down 19% compared with the same time period last year. Percentage of rostered patients is 18% (2016/17) compared with 26% last fiscal year. Visits in Q3 of this FY are 21% lower than in Q1.

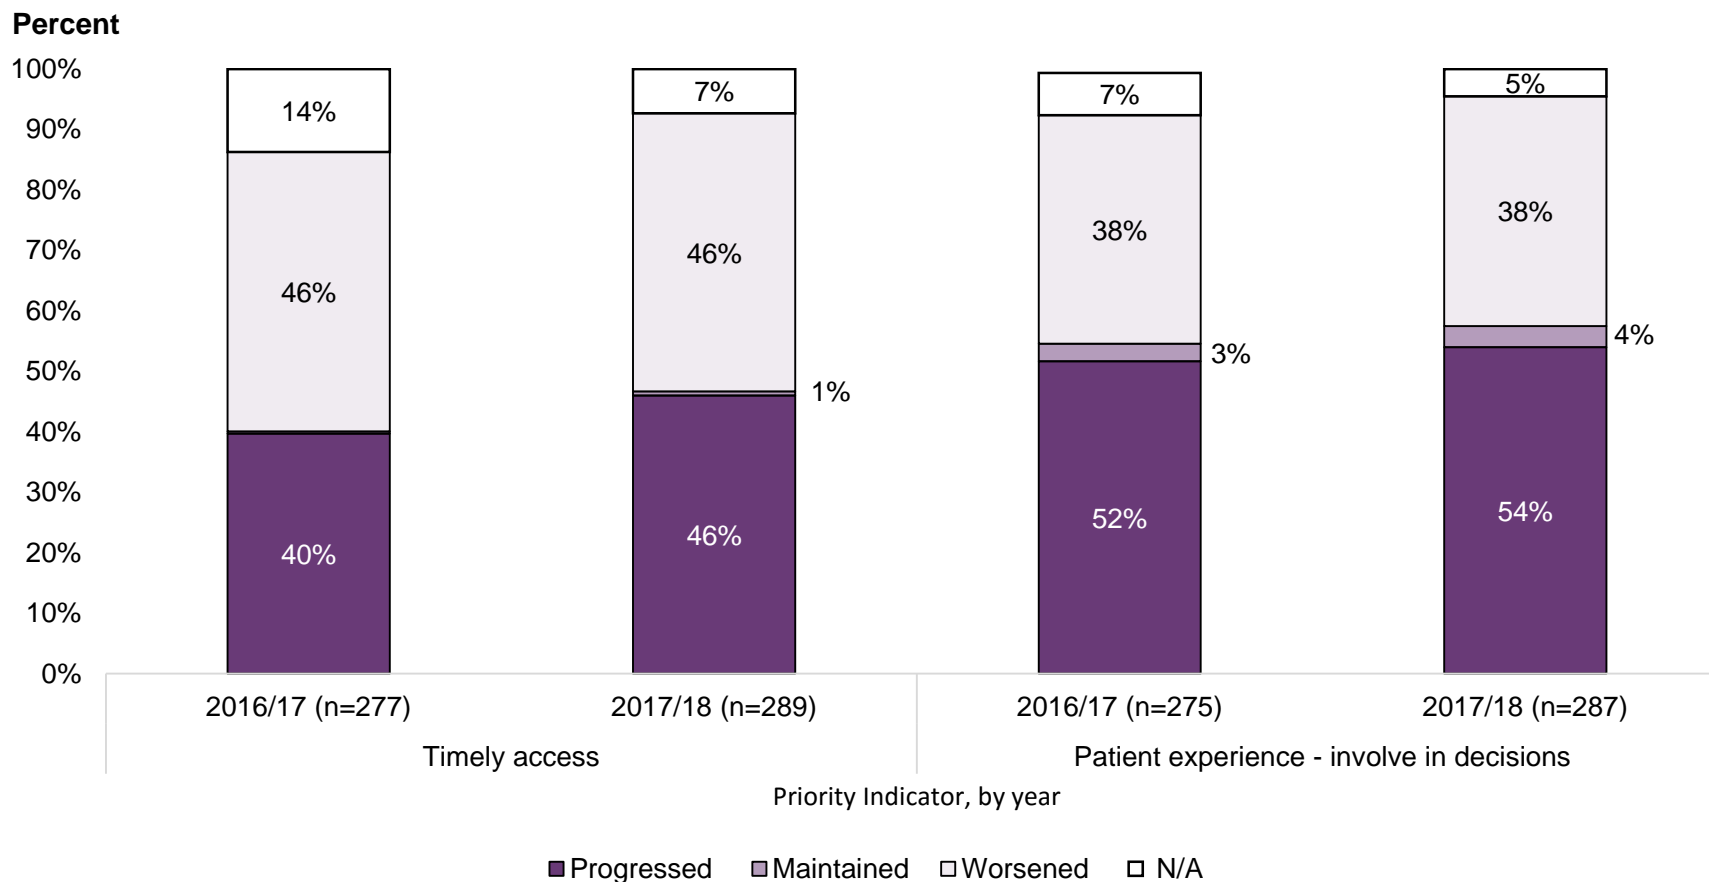

# **Strategic measurement and reporting enhance transparency and promote quality**

Quality Matters: Realizing Excellent Care for All  
A Report by Health Quality Ontario's System Quality Advisory Committee

# Progress on Priority Indicators

Percentage of primary care organizations in Ontario that progressed, maintained or worsened in their performance on priority indicators, compared over two years of reporting

# Same Day, Next Day Access: Rexdale CHC

- **Who was the subpopulation?** 70% of our target panel (76%). Highly transient population leading to larger than expected attrition rate
- **What did the organization do?**
  - Orientation of all new and locum providers regarding advanced access principles,
  - Clients are booked with their assigned provider as often as possible.
  - Nurses and NP's work up to their scope of practice.
- **How did the process change to support this work?**
  - two new satellite clinics
  - successful client recall system in 2017/18
- **What was the outcome?**
  - Third Next Available rate stands at 1.5 days
  - No Show Rates: dropped to 9.54 % from >15%.

# Progress on Cancer Screening

Percentage of primary care organizations in Ontario that progressed, maintained or worsened in their performance on additional indicators, compared over two years

# Uptake of Primary Care Indicators

Primary Care Organizations Indicator Selection for 2018/19 (n=288)

# Target Setting: Same Day, Next Day Survey Data

Percentage of patients and clients able to see a doctor or nurse practitioner on the same day or next day in Ontario, QIP 2017/18

# Target Setting: Patient Experience

**Distribution of Targets Set for *Patient's Experience: Patient Involvement in Decisions About Care Indicator* Selected by Primary Care Organizations in Comparison to their Current Performance, QIP 2017/18**

\*NOTE: The selection count and n is varied because few organizations have either the current performance or target performance collecting baseline or suppressed

Target set in direction of improvement (better than CP)  
Target set to maintain  
Target set worse than CP

# Target Setting: Colorectal Cancer Screening

# Population health (cancer screening and HbA1c)

- Majority of the change ideas are related to identifying the patients in EMR- sharing queries, and “preventative toolbar”.
- Complex communication situations between different primary care providers and diabetes education centres.

Even better if:

- stratify by subpopulations
- regional geographical areas
- partner with provincial partners

# 135 Organizations Working on Medication Reconciliation

- Often described as a part of Health Links, or working regionally with subpopulations such as COPD, CHF....
- Enables hospital medication reconciliation (two indicators)
- Supports de-prescribing medications (Choosing Wisely and ARTIC) – examples, Health for All FHT, St. Josephs Urban FHT, NYGH FHT, Markham FHT
- Development of Best Possible Medication Histories (an outcome of MedRec) will be helpful in identifying patients on Opioids.
- Many Quality Based Procedures and Quality Standards are dependent on primary care providers having current medication lists

*Looking Forward*

**2018/19 QIPs**

# The QIP Consultation Process

Patient, Family, and Public  
Advisors Council

QIP Advisory Committee

Branches and departments at  
Health Quality Ontario

Sector associations

External data organizations

QI leads from various organizations

Initial issues and  
indicator matrix

Ongoing  
consultations

2018/19 QIP  
issues &  
indicators

# Determining 2018/19 QIP Priorities

## The Narrative

- Is an executive summary of your QIP and is intended to introduce specific context for your QIP
- Is a means for engaging your patients and staff in QI planning

The Narrative is also a way to capture and understand emerging quality issues

- For example, equity and workplace violence

# QIP Workplan: Indicators

There are four types of indicators:

- **Mandatory (NEW)**
  - REQUIRED in QIP; tied to issues where province-wide improvement is urgently required
  - set by Minister upon consideration of advice from Health Quality Ontario (regulation 187/15 under the *Excellent Care for All Act, 2010*; only applies to Hospital sector)
- **Priority**
  - reflect organizational and sector-specific priorities, as well as system-wide, transformational priorities where improved performance is co-dependent on collaboration with other sectors.
  - Recommended, not required. Must justify decision not to include in QIP
- **Additional**
  - measure important areas for QI and can be included in your QIP to reflect your organization's specific QI goals and opportunities
- **Custom**
  - any other indicators your organization includes in your QIP

# Quality Issues and Indicators for the 2018/19 QIPs

	Hospital	Primary Care	Home Care	Long-Term Care
Effective	Effective transitions <ul style="list-style-type: none"> <li>• Readmission for one of CHF, COPD or stroke (QBP) (P)</li> <li>• Readmission for mental health and addiction (P)</li> <li>• Patient received enough information on discharge (P)</li> <li>• Discharge summaries sent within 48 h of discharge (A)</li> </ul>	<ul style="list-style-type: none"> <li>• 7-day post-discharge follow-up (any provider) (P)</li> <li>• 7-day post-discharge follow-up for select conditions (CHC) (P)</li> <li>• Hospital readmissions for select conditions (A)</li> </ul>	<ul style="list-style-type: none"> <li>• Hospital readmissions (P)</li> <li>• Unplanned ED visits (P)</li> </ul>	<ul style="list-style-type: none"> <li>• Potentially avoidable ED visits for ambulatory care-sensitive conditions (P)</li> </ul>
	Coordinating care <ul style="list-style-type: none"> <li>• Identify patients with complex health needs (Health Links) (A)</li> </ul>	<ul style="list-style-type: none"> <li>• Identify patients with complex health needs (Health Links) (A)</li> </ul>	<ul style="list-style-type: none"> <li>• Identify patients with complex health needs (Health Links) (A)</li> </ul>	
	Treatment of pain and use of opioids <ul style="list-style-type: none"> <li>• Narrative</li> </ul>	<ul style="list-style-type: none"> <li>• Narrative</li> </ul>	<ul style="list-style-type: none"> <li>• Narrative</li> </ul>	<ul style="list-style-type: none"> <li>• Narrative</li> </ul>

Safe	Safe care/medication safety <ul style="list-style-type: none"> <li>• Medication reconciliation (discharge) (P)</li> <li>• Medication reconciliation (admission) (A)</li> <li>• Use of physical restraints in mental health patients (A)</li> <li>• Antibiotic-free days (ICU) (A)</li> </ul>	<ul style="list-style-type: none"> <li>• Medication reconciliation (A)</li> </ul>	<ul style="list-style-type: none"> <li>• Falls for long-stay clients (P)</li> </ul>	<ul style="list-style-type: none"> <li>• Prescribing of antipsychotic medications (P)</li> <li>• Restraints (A)</li> <li>• Falls (A)</li> </ul>
	Workplace violence <ul style="list-style-type: none"> <li>• Overall incidents of workplace violence (M)</li> </ul>	<ul style="list-style-type: none"> <li>• Narrative</li> </ul>	<ul style="list-style-type: none"> <li>• Narrative</li> </ul>	<ul style="list-style-type: none"> <li>• Narrative</li> </ul>
Timely	Timely access to care/services <ul style="list-style-type: none"> <li>• ED length of stay (complex) (A)</li> </ul>	<ul style="list-style-type: none"> <li>• Timely access to primary care (patient perception) (P)</li> </ul>	<ul style="list-style-type: none"> <li>• Wait time for home care (personal support worker, nurse) (P)</li> </ul>	
Equitable	Population health/equity considerations <ul style="list-style-type: none"> <li>• Narrative</li> </ul>	<ul style="list-style-type: none"> <li>• Glycated hemoglobin testing (A)</li> <li>• Colorectal &amp; cervical cancer screening (A)</li> <li>• Narrative</li> </ul>	<ul style="list-style-type: none"> <li>• Narrative</li> </ul>	<ul style="list-style-type: none"> <li>• Narrative</li> </ul>

Legend: (P): Priority indicator (M): Mandatory indicator (A): Additional indicator (QBP): Indicator related to quality-based procedures

# 2018/19 QIP Indicators: Primary Care

- Timely access to primary care provider
- Hospital readmission rate select HIGs
- Glycated hemoglobin (HbA1C) testing
- Colorectal cancer screening (overdue) (Cancer Care Ontario)
- Cervical cancer screening (overdue) (Cancer Care Ontario)
- Patient experience: involved in decisions about care
- 7-day post-discharge follow-up (any provider)
- Identify complex patients (Health Links)
- 7-day post-discharge follow-up
- Colorectal cancer screening (up-to-date)
- Cervical cancer screening (up-to-date)
- 7-day post-discharge follow-up (CHC)
- Diabetic foot ulcer risk assessment (A)

## RETIRED

- Up-to-date with cervical and colorectal cancer screening (PCPR indicators)
- 7 day post discharge follow up (MOH)

## MODIFIED

- Post-discharge follow-up (any provider) now a priority indicator

## NEW

- 7 day post-discharge follow-up (CHC)
- Diabetic foot ulcer risk assessment (A)

# QIP Narrative

## 2018/19

- Overview
- QI achievements from the past year
- Collaboration and integration
- Engagement of leadership, clinicians and staff
- Patient/resident engagement and relations
- Workplace violence and prevention
- Population health and equity
- Alternate level of care
- Opioid prescribing and opioid use disorder in the treatment of pain

# Patient/Resident Engagement and Relations

There is a spectrum of approaches for engaging patients / clients / residents, including sharing, consulting, deliberating, and collaborating with advisors.

Describe how your organization has engaged your patients / clients / residents in the development and implementation of your quality improvement plan and quality improvement activities over the past year. What do you have planned for the year ahead?

# Workplace Violence and Prevention

Please describe how workplace violence prevention is a strategic priority for your organization. For example, is it included in your strategic plan or do you report on it to your board?

## Upcoming resources

- Quality Improvement Plan Guidance: Workplace Violence Prevention
- Insights into Quality Improvement: Workplace Violence Prevention from the 2017/18 Quality Improvement Plans
- Health Quality Compass section on workplace violence prevention
- Webinar

# Population Health and Equity (collapsed)

How has your organization addressed/recognized the needs of unique populations in its quality improvement efforts including, for example, indigenous and francophone communities? How has your organization worked to promote health equity through your quality improvement initiatives?

# Opioids Prescribing and Opioid Use Disorder in the Treatment of Pain

Describe what steps your organization is taking to support the effective treatment of pain including opioids treatment practices and promoting alternatives to treatment.

Prompts: Think about access to addiction services, social services, (sub) populations, etc.

# MyPractice

A personalized report for quality care

[View health service utilization for my practice \(page 16\)](#)

Primary Care Practice Report

Health Quality Ontario

Change Ideas for Cancer Screening

How can I improve my cancer screening indicators?

☒ Identify and verify which patients are due/overdue for cancer screening

- Register for and view your Cancer Care Ontario (CCO) Screening Activity Report (SAR) to find the screening status of your patients.
- Ask your billing administrator or nurse to run an EMR report listing patients due/overdue for screening.
- Update your EMR by comparing your EMR output with your CCO SAR.

☐ Set your goals for improvement

- Use your up-to-date list of patients due/overdue for screening to set goals, including numerical and time-sensitive targets (how many patients are screened by which dates).

☐ Map your practice's current cancer screening process

- Outline the steps involved and the people responsible. This will help you identify inefficiencies and opportunities for improvement.

☐ Update process to track patients eligible for screening

- Create screening reminder letters for patients using these templates from [Cancer Care Ontario](#) or sign up for [physician linked correspondence](#) for automatic screening reminders for patients.
- Update EMR when reminder notices are issued. Regularly review list of patients due/overdue.

☐ Follow up with patients who haven't been screened

- Consider how issues of equity might be affecting your patients who haven't been screened. Review [Poverty: A Clinical Tool for Primary Care](#) from the Ontario College of Family Physicians. For an example of how a health centre analyzed inequities in screening rates, [read the story](#) from TAIBU CHC in Toronto.

Learn from your peers

- Reach out to local leaders working with the [Provincial Primary Care and Cancer Network](#).
- See additional screening process improvement ideas and measures from [Cancer Care Ontario](#).

THE COMMON QUALITY AGENDA 2016

## Measuring Up

A yearly report on how  
Ontario's health system  
is performing

*Let's make our health system healthier*

*Looking Forward*

**Changes to Navigator**

# Navigator Key Dates and Timelines

- Navigator will launch by November 30, 2017
- Log in before March to ensure there are no surprises
- There will be Navigator training sessions this fall and winter to highlight the new functionalities
- Navigator closes briefly in February so that the indicator current performance values can be prepopulated
- Ensure the QIP is on your Board's calendar prior to April 1, 2018 submission.

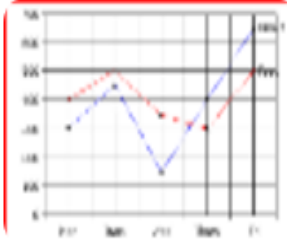

# Navigator Enhancements: Progress Report (PR)

 EXPORT CURRENT PROGRESS  
REPORT WITH CHANGE IDEAS

 EXPORT CURRENT PROGRESS  
REPORT WITHOUT CHANGE IDEAS

 EXPORT FULL PROGRESS REPORT  
TEMPLATE

To enter progress for a Measure/Indicator, click on the "EDIT" button under the ACTIONS column.

ID	INDICATOR (UNIT; POPULATION; PERIOD; DATA SOURCE)	ORG ID	PERFORMANCE STATED IN PREVIOUS QIP	PERFORMANCE TARGET AS STATED IN PREVIOUS QIP	CURRENT PERFORMANCE	COMMENTS	RESULTS
1	% of french language surveys offered per french speaking- preferred resident population ( %; Survey respondents; 2017; In house	777888999	0.00	90.00	85.00		

- Current performance in Progress Report and Workplan automatically linked
- Ability to add new change ideas
- Ability to export full Progress Report template
- Format change of Progress Report – change ideas moved up, comments optional
- Ability to add graphic/results (graphs)

# Navigator Enhancements: Workplan

**Change Idea**

Change Idea ?

Quality Dimension ? Safe

Issue ? Medication safety

Measure / Indicator ? Medication reconciliation at admission: The total number of patients with medications reconciled as a proportion of the total number of patients admitted to the hospital

**Best Practices/Change Ideas** [Quality Compass 'Safer Healthcare Now! Medication Reconciliation in Acute Care Getting Started Kit' Institute for Safe Medication Practices Canada website](#)

Organization Hospital A (Test)

Change Number

Planned Improvement Initiatives (Change Ideas) ?

Methods ?

Process Measures ?

Target for process measure ?

Comments ?

**Buttons:** > GOTO MEASURE, > GO TO CHANGE #, #, ✕ DELETE THIS CHANGE IDEA, CANCEL, SAVE, SAVE & CLOSE, + ADD NEW CHANGE IDEA

- Addition of resources (links) to change ideas window
- Ability to change order of change ideas
- Automated calculations for surveys
- Ability to export full workplan template

## Other Enhancements

Improved automated password reset process

Ability to export full Narrative template

New 'simplified' Query QIP report (issue + sector)

# QIP Supports QUORUM

## Ontario's new online health care quality improvement community

Great change  
ideas live here

And here,  
aligned to each  
indicator

## Quality Compass

- Quality Compass is an online repository of evidence-informed information and change ideas focused on the priority indicators found in Ontario's QIPs.
- The tool supports health care leaders and providers in the primary care, home and community care, long-term care and hospital sectors to implement change.
- <http://qualitycompass.hqontario.ca/>

qip@hqontario.ca

## Health Quality Ontario

*Let's make our health system healthier*

# Learn about shareable ideas in 5 Steps using Query QIP

1. Go to HQO's Navigator website. Search for "[HQO Navigator](#)" in your internet browser and click on this site. You don't need to login, as Query QIP is publically available.
2. Click on the "[Query QIP](#)" tab at the top of the webpage, and you will see a drop down menu of options.
3. Decide if you want to search by text or by indicator, and if you want to search the Narrative, Workplan or Progress Report. Each report is created separately.
4. If you select "text" (and not indicator), enter the term / text you want to search in the first field. If you select "indicator" ( and not text), consider if this indicator is a priority, additional or custom QIP indicator. Select this as a parameter before selecting the indicator you want to search. If you don't know if the indicator is a priority, addition or custom indicator, simply select all three. Answer each of the other fields in turn to complete your report parameters.
5. To see each use of the term / text in the report you are creating, make sure you say "yes" to the last question, which highlights your text word with every instance of its use in the report.

If you have any trouble using Query QIP, or any of the Navigator functionality email: [qip@hqontario.ca](mailto:qip@hqontario.ca) .

# Get connected to Quality Standards. Each quality standard focuses on a certain health care issue and consists of:

Clinical Guide

Recommendations for Adoption

Patient Guide

Information and Data Brief

Data Infographic

A Getting Started Guide and Action Plan Template to assist providers, teams and organizations to use the quality standard and prioritize quality statements to guide improvement.

The 'Quality Standards Action Planning Template' is a form with a header section and a table. The header section includes the 'Quality Standards' logo and the title 'Putting Quality Standards into Practice', with a subtitle: 'A guide designed for people who are interested or involved in using the quality standards to improve care'. The 'Health Quality Ontario' logo is at the bottom right. The table has four columns: 'Data Decided (dd-mm-yyyy)', 'Person Responsible', 'Deadline for Action (dd-mm-yyyy)', and 'Status Update'. Below the table is a section for 'Question' and 'Your Answer', with a subtitle: 'Which quality statement is this action plan for?'. The form includes several 'Click on field and type to insert text' prompts. The 'Ontario' logo is at the bottom right.
